## PREVIOUS ACADEMIC EXPERIENCE

### A. Relevant Course Work towards Doctorate degree:

Additional education and strong knowledge in the basic sciences.

Topic	Course Number
Molecular/Cell Biology	IDS 100
Advanced Cell Biology	CB 245
Molecular Biochemistry	PC 205
Immunology	Micro/Immunol 204
Oral Microbiology/Virology	OB 225/OB 226
Dental Hygiene (seminar)	DH 301
Dental Hygiene (clinical teaching)	DH 201A, 203B, 201C

Graduate courses in dental hygiene included discussions of curriculum theory and design, conceptual framework and clinical teaching techniques.

### B. Laboratory Research Experience:

1. Lab: Nina Agabian, PhD. Intercampus Program of Molecular Parasitology, University of California, San Francisco, Laurel Heights campus. September

- 1990-March 1991. Aids-Associated Candidiasis: proteins involved in invasion and pathogenesis. Emphasis: Transformation of *Candida Albicans* with integrins, a family of cell surface adhesion molecules – the role of matrix receptors in the regulation of invasion and their relationships to the pathogenicity of these organisms.
2. Lab: Caroline Damsky, PhD. Department of Stomatology, Graduate Group in Oral Biology, University of California, San Francisco.
- a. March 1990 – August 1990. The Regulation of Differentiation and Integrin Expression by Bromodeoxyuridine in a Hamster Melanoma Cell Line, CS-1. Emphasis: the comparison of the production of matrix-degrading proteases and the invasive behavior of melanoma cells treated with or without 5-bromodeoxyuridine.
- b. March 1991 – Dec 1992. Thesis Project: The Influence of the growth factor, Transforming Growth Factor-beta (TGF- $\beta$ 1), in the regulation of the invasive phenotype of hamster melanoma cells. Emphasis: to uncover the mechanisms by which tumor cells regulate their ability to invade tissue.
